

# Customer Shopping Behavior Analysis

Uncovering insights from transactional data to guide strategic business decisions.

# Project Overview & Dataset

## Project Goal

Analyze 3,900 purchases to understand spending patterns, customer segments, product preferences, and subscription behavior.

## Key Features

- Customer demographics (Age, Gender, Location, Subscription)
- Purchase details (Item, Category, Amount, Season, Size, Color)
- Shopping behavior (Discount, Promo, Previous Purchases, Frequency, Review, Shipping)

## Dataset Summary

- Rows: 3,900
- Columns: 18
- Missing Data: 37 values in Review Rating

# Exploratory Data Analysis (Python)

Our Python-based EDA involved loading, exploring, cleaning, and standardizing data to ensure accuracy and readiness for analysis.

# Advanced Data Preparation

## Feature Engineering

Created **age\_group** by binning ages and **purchase\_frequency\_days** from purchase data.

## Data Consistency

Verified and dropped redundant **promo\_code\_used** column.

## Database Integration

Loaded cleaned data into PostgreSQL for SQL analysis.

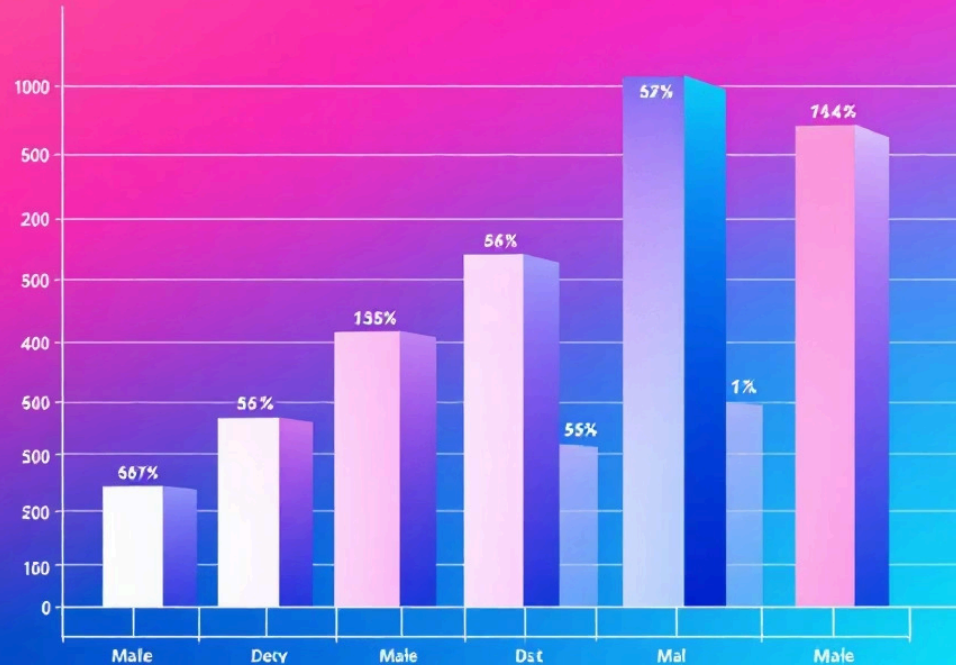

# Key SQL Insights: Revenue & Products

## Revenue by Gender

Male customers generated significantly more revenue (\$157,890) than Female customers (\$75,191).

## Top 5 Products by Rating

- Gloves (3.86)
- Sandals (3.84)
- Boots (3.82)
- Hat (3.80)
- Skirt (3.78)

# SQL Insights: Shipping & Subscriptions

## Shipping Type Comparison

Express shipping users had a higher average purchase amount (\$60.48) compared to Standard shipping (\$58.46).

## Subscribers vs. Non-Subscribers

Non-subscribers contributed more total revenue (\$170,436) than subscribers (\$62,645), despite similar average spend.

# SQL Insights: Discounts & Loyalty

## Discount-Dependent Products

Hat (50%), Sneakers (49.66%), Coat (49.07%), Sweater (48.17%), Pants (47.37%) had the highest discount rates.

## Customer Segmentation

Loyal customers (3116) form the largest segment, followed by Returning (701) and New (83).

## Repeat Buyers & Subscriptions

Customers with >5 purchases are more likely to be non-subscribers (2518) than subscribers (958).

# SQL Insights: Top Products & Age Groups

## Top 3 Products per Category

- **Accessories:** Jewelry, Sunglasses, Belt
- **Clothing:** Blouse, Pants, Shirt
- **Footwear:** Sandals, Shoes, Sneakers
- **Outerwear:** Jacket, Coat

Young Adults contribute the highest revenue, followed closely by Middle-aged customers.

# Interactive Dashboard in Power BI

A comprehensive Power BI dashboard visualizes key metrics:

Number of Customers

Average Purchase Amount

Average Review Rating

Customers with Subscriptions

# Strategic Business Recommendations

01

## Boost Subscriptions

Promote exclusive benefits to increase subscriber base.

02

## Customer Loyalty Programs

Reward repeat buyers to foster loyalty and retention.

03

## Review Discount Policy

Optimize discount strategies to balance sales and profit margins.

04

## Targeted Marketing

Focus campaigns on high-revenue age groups and express-shipping users.
